

**Call for Posters**  
**CENSUS TRANSPORTATION DATA APPLICATIONS**

**DUE: August 1, 2004**

The Subcommittee on Census Data for Transportation Planning (ABJ30(1)) is sponsoring a poster session for the 83rd TRB Annual Meetings in January 2005. The poster session centers on the innovative and creative ways, in which the transportation community analyzes, presents and displays census data.

Under the TRB guidelines, a poster session is a series of presentations on vertical display boards with direct interaction between the presenter and attendees. The entire presentation is placed on a display board and should be considered the equivalent to the conventional paper or presentation sessions.

Typically, a TRB Poster Session is made up of reviewed papers. Because the CTPP 2000 Part 3 data have only recently been available, you may not have a full paper ready, so presentations will be considered.

Individuals interested in sharing the innovative and creative ways in which they are displaying and making Census data available are encouraged to "showcase their work". Those seeking publication as part of the TRB Research Record series need to have their paper submitted, according to TRB guidelines no later than August 1, 2004. For more information on the paper submittal process or the Annual meeting refer to;

<http://www4.trb.org/trb/annual.nsf>

For those wishing to present their materials without seeking full publication may submit an abstract by August 1, 2004 to Bob Sicko, Chair of the Subcommittee on Census Data for Transportation Planning at the address and phone number below. More detailed information and general instructions for a TRB Poster Session can be found at;

<http://www4.nas.edu/trb/annual.nsf/web/posters>

Should you have any questions please contact Bob Sicko, Subcommittee Chair, or Ed Christopher, Chair of the Urban Data and Information Systems Committee (ABJ30).
